

Elite Paint Protection Training (EPPT)

This training will guide you through the advanced tips and techniques for installation of paint protection film. You will be taught the tricks and tips to improve your installations, reduce installation times and most importantly instill a high level of confidence in each installation. We have allotted about two hours of presentation time/question/answer period with the balance of time in the shop to support the installation process.

We will provide the competitive edge to your installations to become a master PPF installer.
